

Targeted Comment Demo

This paragraph contains comments for different co-authors. Only the active viewer should get the matching margin highlights.

We propose a cleaner proof strategy [\[Please verify the induction step before we submit.\]](#) for the main theorem.

The terminology in this section [\[Can you confirm whether “estimator” is the right word here?\]](#) still needs one more review pass.

Important requests get a stronger margin box: [\[Please add the missing citation before we freeze the draft.\]](#)

AL

Shared requests can target everyone: [\[Please check whether this paragraph still matches the introduction.\]](#)

CL

Resolved comments stay visible inline, but they do not target anyone: [\[This point has already been handled.\]](#)

Bob can still reply inline in the usual way: [\[I took care of the comment.\]](#)

BO

Adjacent comments for the same active viewer share one margin note: [\[Please check the notation here.\]](#) [\[Also verify the citation label.\]](#)

AL

BO

The active viewer can come from a local override or from automatic user-id detection, so only that person’s open comments appear in the margin and contribute to the header count.
